## Dampers

---

**#1310**

Small square shut-off damper. This cast iron damper from Finland fits perfectly in an 8" x 8" outside dimension clay or refractory flue tile liner. Inside opening measures 6.3" x 6.3". Damper handle can be easily shortened. The frame does not extend through the brick work on Finnish dampers so we generally use a piece of stone to bridge over the handle.

## Cookstove Components

---

**#1132**

**New cooktop.** This is the new standard large cooktop from Finland. Smooth sides and rear allow masonry to align exactly with edges or have an overlap for a ceramic or stone tile border. A large overhanging lip on the front locks in the new oven and loading door lipped frame tops for a long term, trouble-free, secure fit. New longer safety bar keeps kids and hands away from hot cooktop and doubles as towel rack.

With three hot plates. 1075mm x 660mm (42 1/4 " x 26") weight 43.5 kg.

**\$835.00**

**#1230**

**New cast-iron cookstove bakeoven with glass door.** Designed to mate with #0314 cooker door and #1130 cooktop (see above). This oven has a built in soot door access panel for under oven cleaning as well as an indented lip atop its frame to lock under the cooktop. This oven is quite rugged and can easily handle 4-6 loaves of bread. Oven racks and a cookie tray included.

355mm x 510mm x 365mm (14" x 20 1/16" x 14 3/8")
